uncle

Spring construction is dangerous because there could be bumps or potholes in the roads that isn't good for truck drivers. So my uncle can read signs to know if there is a pothole or bump ahead, and before he leaves he has to make sure to do a pre trip, its in portland to be safe because I don't want him to get hurt or to have good amount of sleep so he doesn't fall asleep on his way there or back, its in portland for my uncle to come home so we can watch like works together juking both sides.
